1 Introduction

To support tuna stock and tuna ecosystem sustainability, ISSF Participating Companies (PC) have committed to meet a number conservation measures designed to improve the long-term health of tuna fisheries.

This document describes the protocol for the auditing of PC compliance with those conservation measures in effect for Q4 of 2017 through Q3 of 2018.

Per the [ISSA Compliance Policy](#), PCs are obliged to respond fully, accurately and in a timely manner to all reasonable requests made during the reviews. PCs must provide appropriate supporting documents, data or other support. Appropriate confidentiality obligations will be established and observed by ISSF staff and the consultant(s). MRAG will provide a Final Audit Report on each company's participation and cooperation in the audit process.

Following completion of the Final Audit Report, in accordance with the ISSA Compliance Policy, follow-up auditing may be required to address corrective actions and prepare an updated compliance status report. The ISSA Compliance Policy requires that the PC must bear the expense of the follow-up audit and will be subject to a separate agreement between the PC and MRAG. No additional auditing shall commence until the agreement is signed and initial deposit paid by the PC. Payment for the follow-up audit is required irrespective of the outcome of the efforts to resolve non-conformances. ISSF will not publish a PC's updated compliance status report on the ISSF website until MRAG has been paid for the work performed and all the requirements of the Compliance Policy have been satisfied. Under the Compliance Policy, failure of the PC to pay the auditor for any follow-up audits referenced in the Compliance Policy will result in a major non-conformance against the PC. Please refer to the ISSA Compliance Policy for complete information.

This document will be amended as required.

2 Program implementation

2.1 Participating Company Compliance

PCs commit to undergo independent auditing against all the in-effect ISSF conservation measures. Table 1 lists the conservation measures in effect for Q4 of 2017 through Q3 of 2018 to be audited under this protocol, provides guidance regarding the required action and/or information, and describes the means of verification that will be used to assess conformance. Each PC is expected to voluntarily provide all necessary information to ISSF and/or MRAG Americas. We encourage PCs to verify that the point of contact they initially provided to ISSF remains up to date. MRAG is authorized by ISSF to liaise only with the PC's designated point of contact. We cannot liaise with anyone else for the purposes of the audit.

The audits will generally follow the principles of ISO 19011. The Program Manager ensures audits are compliant and consistent with the in-effect ISSF conservation measures.

In advance of the annual audit, company details including contact information for the designated contact person will be confirmed with each company. Based on activity, the traceability sample size will be determined and sent with the audit plan. Finally, note that annual audit/traceability data requests for

companies processing only loins and/or trading finished goods will encompass a longer time frame than for round fish. The basic audit process is described in the following chart:

<u>Step</u>	<u>Task</u>	<u>Actions</u>
1	Audit Planning and Scheduling	PCs provide quarterly RFMO data. Audit planning for annual assessments includes an information request to all PCs for a list of controlled vessels, company policies, confirmation of affiliated companies that will be included in the audit and an information request for data to be used for traceability exercises. Thereafter, the auditor requests information relating to specific transactions/can codes along with evidence of conformance with all other conservation measures. Each phase will have associated deadlines for data submission.
2	RFMO Data Review	This phase of the audit includes a review of all quarterly RFMO data for Q4 2017 through Q3 2018 submissions, along with a review of recent RFMO compliance committee reports, commission reports, etc.
3	Policy Review	This phase of the audit includes a review of company policies and a request for sales data from which traceability exercises may be based. The PC may meet the request for traceability data in the form of a list of sales invoices for PVR products or a list of PVR can codes produced.
4	Traceability Audit, etc.	This phase of the audit includes a review of the transactions or can codes selected for the traceability exercises and any conservation measures not assessed during the previous phase.
5	Preliminary Audit Report	At the completion of all audit phases, the auditor(s) will prepare a preliminary report outlining performance, including any non-conformances, and provide the report to the PC and ISSF.
6	Remediation Period and Final Audit Report	A 30-day discussion/remediation period will follow each preliminary report, during which PCs can provide to the auditor(s) clarifications or additional information to resolve non-conformances. At the end of this 30-day period, the auditor(s) will issue a Final Audit Report to the PC and ISSF. It is strongly recommended that each PC's designated point of contact makes himself or herself available during this discussion/remediation period.
7	Follow-Up Audit (if necessary)	Any follow-up audits will be conducted in accordance with the ISSA Compliance Policy. (See Section 1).

3 Conservation Measures and Means of Verification

Table 1: ISSF Conservation Measures, Audit Guidance and Means of Verification

Conservation Measure	Category	Gear Type	Category Guidance	Means of Verification	Frequency
1.1	Tuna RFMO Authorized Vessel Record	All	All purchases must be from vessels listed on the authorized vessel record of the RFMO governing the ocean area in which the tuna was caught, at the time of the fishing trip, so long as the vessel is of a size subject to listing in the RFMO authorized vessel record. For any purchases from non-PVR vessels, maintain a system to check and approve vessel listing.	Auditor reviews company system to ensure that purchases are from properly listed vessels. The traceability exercises, reviewing RFMO vessel records and checking ocean areas where vessels are fishing, verifies the system.	Annually
1.2	RFMO Participation	All	All purchases must be from vessels flagged to a member or cooperating non-member of RFMO relevant to fishing area.	Auditor reviews quarterly data sent by the company to the RFMO to check that all vessels meet this requirement.	Quarterly
2.1	Product Traceability	All	Demonstrate ability to trace products from can code or sales invoice to vessel and trip.	Auditor will review recent mock recalls, if available, and select a sample (i.e. all sales for a specific month) of can codes or sales invoices by label and destination from which the company will conduct traceability exercises. If the company produces cans from loins, or sells loins as a finished good, these products must be included in the assessment and the traceability exercise will cover a 3-month period.	Annually
2.2	Quarterly Data Submission to RFMO	All	a. Send information for all round fish purchases (skipjack, albacore, yellowfin, bigeye) as described in the measure to RFMO scientific bodies for each quarter by the last day of the following calendar quarter.	Auditor checks that information has been sent by companies to RFMO for all purchases.	Quarterly

Conservation Measure	Category	Gear Type	Category Guidance	Means of Verification	Frequency
			<p>b. As described by ISSF, for each quarter, Participating Companies are required to report to RFMO (no later than the last day of the following calendar quarter) if they have no purchase of round fish (in total or from a typical RFMO region).</p> <p>c. A Participating Company that only purchases loins and finished goods is exempt from sending RFMO data. However, company must affirm so quarterly via an unprompted email to rmodata@iss-foundation.org</p>	<p>Auditor checks if PC has sent quarterly report to the RFMO, indicating that company only purchases loins and/or finished goods.</p> <p>Auditor checks that email has been sent to rmodata@iss-foundation.org indicating that company only purchases loins and/or finished goods.</p>	
2.3	Product Labelling by Species and Area of Capture	All	<p>Processors, traders, importers, transporters, marketers and others involved in the seafood industry shall on all product labeling, or through a publicly available web-based system by product, for all branded tuna products:</p> <p>1. Identify the species of tuna contained in the product. For example:</p> <p>Katsuwonus pelamis, Skipjack, Bonite, Listado</p> <p>Thunnus alalunga, Albacore, Germon, Atún blanco</p> <p>Thunnus albacares, Yellowfin, Thon Jaune, Rabil</p> <p>Thunnus obesus, Bigeye, Thon Obese, Patudo</p> <p>2. Identify the ocean of capture for the tuna contained in the product.</p> <p>This measure will apply to all product labeling as of January 1st, 2018.</p>	<p>Auditor obtains list of consumer-facing branded products, and checks that said list includes information on the species of tuna (scientific name and/or common name), and ocean of capture.</p> <p>Auditor may also verify conformance with this CM during the annual traceability exercise.</p>	Annually
3.1(a)	Shark-Finching Policy	All	Company establishes and publishes policy prohibiting shark finning.	Auditor reviews company website for published policy.	Annually

Conservation Measure	Category	Gear Type	Category Guidance	Means of Verification	Frequency
3.1(b)	Prohibition of Transactions with Shark-Finishing Vessels	All	Refrain from transactions with vessels that have shark finned within two years of the product purchase date (as found by RFMO or competent national authority)	Auditor reviews company system for ensuring no transactions with vessels that practice shark finning. The company system is verified by checking purchases against data gathered throughout the year of RFMO compliance reports, media sources, etc.	Annually
3.1(c)	Prohibition of Transactions with Companies without a Public Policy Prohibiting Shark Finning	All	No transactions with companies that do not have a public policy prohibiting shark finning. If transactions involve flag states that absolutely prohibit shark finning no policy is required. If flag state allows 5% shark fin retention, the company must have a public policy.	Auditor reviews company procedure for ensuring that all tuna purchases have come from a company that has a public policy prohibiting shark finning. For flag states that do have an absolute shark finning prohibition, auditor will review all publicly available material to ensure no shark finning has taken place. Traceability exercises by transaction or can code to PVR vessels or proof of compliance verifies the system.	Annually
3.2	Large-Scale Pelagic Driftnets Prohibition	All	No transactions in vessels using large-scale pelagic driftnets.	Auditor reviews quarterly report by gear type and identifies any use of large-scale driftnets. This is done by first identifying vessels using gill nets, then following up on the size of the net. Maximum net size is 2.5 km.	Quarterly, or as reports are issued
				Auditor reviews RFMO compliance committee reports for any indication of vessels using large-scale pelagic driftnets.	
3.3	Full Retention of Tunas	All Purse Seine	All purse seine caught tuna (skipjack, yellowfin and bigeye) retained onboard, except those unfit for human consumption as defined, or when in the final set of a trip, there is insufficient well space to	Auditor reviews whether the company sources tuna from vessels that practice full retention of tunas. Auditor checks PVR. For vessels not	Annually

Conservation Measure	Category	Gear Type	Category Guidance	Means of Verification	Frequency
			accommodate all fish caught in that set. If the vessel fishes in areas where full retention is mandatory, no further policy is needed. If RFMO does not require full retention, vessel must have documented and implemented policy in accordance with this conservation measure.	listed on the PVR, company provides evidence of vessel policy such as: agreement with observer provider to check tuna retention and RFMO or flag state requirement regarding full retention of tunas. RFMO compliance reports are reviewed to identify any vessels/trips that may not comply.	
3.4	Skipper Best Practices	All Purse Seine	Unless exempt per Conservation Measure 8.1, skipper ¹ has attended an ISSF Skippers Workshop in person, has viewed the Skippers Workshop video online, or has reviewed the Skippers Guidebook. The workshop video is located at this link . The online guidebook is located at www.issfguidebooks.org .	Auditor reviews whether the company has purchased tuna only from vessels with skippers that have completed ISSF best practices education. Auditor checks PVR and ISSF list of individuals who have attended Skippers Workshops or have certified that they read the online Skippers Guidebook or viewed the online Skippers Workshop video; or the PC may provide evidence of skipper review of guidebook, video, including list of skippers, method of review and dates of completion.	Annually
3.5	Transactions with Vessels that use Only Non-Entangling FADs	All Purse Seine and Support Vessels	Processors, traders, importers, transporters, marketers and others involved in the seafood industry shall conduct transactions only with those purse seine vessels whose owners have a public policy regarding the use of only non-entangling (NE) FADs. The policy should refer to the ISSF Guide for Non-Entangling FADs	Auditor reviews evidence showing that the company conducts transactions only with purse seine vessels that have a public policy regarding the use of only non-entangling FADs. Auditor reviews whether RFMO/flag state or fleet	Annually

¹ The intent of this conservation measure is that the person or persons trained are those in leadership roles onboard the vessel directing the fishing operations.

Conservation Measure	Category	Gear Type	Category Guidance	Means of Verification	Frequency
			<p>and shall apply to all new FAD deployments, regardless of the type of vessel that deploys the FADs.</p> <p>For the purposes of this measure a policy is “public” if it is published on the company’s website or is otherwise available to the general public.</p> <p>For purposes of this measure, NE FADs should meet the minimum specifications in the ISSF Guide for Non-Entangling FADs. Vessel owners shall not deploy FADs that meet the description of "highest entanglement" contained in the ISSF Guide.</p> <p>If RFMO/flag state where vessel(s) operate has an in-effect mandatory requirement for NE FADs, which equals or surpasses the ISSF guidelines for NE FADs, then vessel owner is not required to have an individual public policy.</p> <p>If the vessel is a member of a fleet association that has a public policy on NE FADs, which equals or surpasses the ISSF guidelines for NE FADs, the individual vessel must have a policy implementing the fleet association policy.</p>	association has an in-effect mandatory requirement for NE FADs, which equals or surpasses ISSF guidelines for NE FADs.	
3.6	Transactions with Vessels Implementing Best Practices for Sharks and Sea Turtles	Large-scale Longline	<p>Processors, traders, importers, marketers and others involved in the seafood industry shall conduct transactions only with those longline vessels whose owners have a policy¹ requiring the implementation of best practices for sharks and marine turtles.</p> <p>For the purposes of this measure, a large-scale longline vessel is defined as a vessel that is equal to or greater than 20m length overall (LOA).</p> <p>This measure comes into effect July 1st, 2018.</p>	<p>Auditor reviews evidence showing that the company conducts transactions only with large-scale longline vessels that have a policy requiring the implementation of the following best practices for sharks and marine turtles:</p> <p>(a) the use of circle hooks and only monofilament line;</p>	Annually

Conservation Measure	Category	Gear Type	Category Guidance	Means of Verification	Frequency
				<p>(b) the implementation by the crew of best practice handling techniques, such as those outlined in the ISSF Skippers' Guidebook to Longline Fishing Practices; and</p> <p>(c) No use of "shark lines" at any time.²</p> <p>Auditor reviews date on which policy was put in effect.</p>	
4.1	Unique Vessel Identifiers - IMO	All	<p>All purchases must be from vessels with an IMO UVI number, unless ineligible due to IMO requirements or due to other reasons stated by IMO.</p> <p>NOTE: The IHS Maritime & Trade (IHSM&T), which manages IMO identification numbers, has expanded the range of vessels that are potentially eligible to obtain an IMO number to include small-scale vessels of less than 100 GT down to a size limit of 12 meters in length overall (LOA) that are authorized to fish outside waters under national jurisdiction. Vessels that are now eligible to obtain an IMO UVI number under this change must apply for and/or have received an IMO number by December 31, 2017.</p> <p>Vessels that fish only in waters under national jurisdiction that provide a national certificate of operation will be considered compliant under this section.</p>	<p>Auditor reviews company system to ensure vessel purchases meet this criterion. A sample of non-PVR purchases will be reviewed to assess whether the company system is adequate to ensure that non-PVR vessels meet this requirement.</p>	Annually

² For the purposes of this measure, shark lines are those defined in the following paper:

https://www.ccsbt.org/sites/ccsbt.org/files/userfiles/file/other_rfm0_measures/wcpfc/CMM-2014-05-Conservation-and-Management-Measure-for-Sharks.pdf

Conservation Measure	Category	Gear Type	Category Guidance	Means of Verification	Frequency
4.2	Purse Seine Unique Vessel Identifiers	All Purse Seine	<p>If IMO requirements do not provide for a particular vessel to receive an IMO UVI for reasons other than vessel size, the vessel shall obtain a TUVI from the Consolidated List of Authorized Vessels (CLAV) CLAV: http://www.tuna-org.org/GlobalTVR.htm or a UVI from ISSF: http://issf-foundation.org/wpcontent/uploads/downloads/2015/02/UVI-and-IMO-numbering-instructions-2015.pdf.</p> <p>If IMO requirements do not provide for a particular vessel to receive an IMO UVI due to vessel size, such vessels do not need to obtain a TUVI from the CLAV or a UVI from ISSF.</p>	Auditor reviews company method to ensure that all vessel purchases meet this criterion. A sample of non-PVR purchases will be reviewed to assess whether the company system is adequate to ensure that non-PVR vessels also meet this requirement.	Annually
4.3(a)	Observer Coverage	Large Purse Seine ³	Evidence of 100% observer coverage (human or electronic) unless exempt or prevented by force majeure. The data collected by the observer must be made available to the flag state authorities and, if appropriate, to the RFMO, in the format required by the flag state (and RFMO). In case the flag state (or RFMO) does not accept the data, the vessel owner must store data for at least three years from the end of the trip. At a minimum, data to be made available are those fields required by the flag state for vessel logbooks.	Auditor assesses company system for observer coverage of controlled vessels, company data submission to RFMOs and RFMO committee meetings and compliance reports, etc. For non-PVR vessel purchases, the PC provides details of agreement with observer provider (human or electronic) for 100% coverage. If RFMO requires 100% observer coverage, no further evidence is required.	Annually
4.3(b)	Observer Coverage Exemption - WCPO Region	Large Purse Seine	Exemptions may be made for large-scale purse seine vessels in the Western and Central Pacific Ocean fishing in latitudes higher than 20°N/S in cases where the catch (retained and discarded; target and non-target) is adequately sampled and reported to the RFMO. Such exemptions shall be based on a detailed report that will be reviewed and approved by the ISSF	Auditor reviews evidence that the vessel meets the requirements for this exemption.	Annually

³Large-scale purse seine vessels are defined as those with at least 335 m3 fish hold volume.

Conservation Measure	Category	Gear Type	Category Guidance	Means of Verification	Frequency
			Board and announced publicly through the ISSF website.		
4.3(b)(i)	Observer Coverage Exemption – New Zealand Flag Purse Seine Vessels	Large Purse Seine	An exemption is granted for tuna caught by New Zealand flag purse seine vessels that operate only within New Zealand waters targeting free school skipjack during the summer season	Auditor reviews evidence that the vessel meets the requirements for this exemption.	Annually
4.3(c)	Observer Coverage – Grace Period for Electronic Monitoring Systems for Certain Large-Scale Purse Seine Vessels	Large Purse Seine	<p>Certain vessels that meet the definition of large-scale purse seine vessels under ISSF conservation measures are not considered large-scale in certain RFMOs and therefore are unable to obtain human observers for each fishing trip to meet the requirements of ISSF Conservation Measure 4.3(a). Owners of large-scale purse seine vessels who fit in this category may seek to install an electronic monitoring system (if proven to be effective) in lieu of human observers. In such an event, the following provisions apply:</p> <ol style="list-style-type: none"> 1. The vessel owner must identify each vessel involved and provide satisfactory evidence of an executed agreement with a service provider to install an electronic monitoring system on each vessel. A satisfactory ‘executed agreement’ should: <ul style="list-style-type: none"> - be dated and signed, - list all parties engaged in the transaction along with their contact information, - list the vessel name(s) and IMO or registration number, 	Auditor reviews list of vessels having applied for, and being granted, the grace period. Auditor compares vessel(s) grace period to PC sourcing records to ensure the dates align.	Annually

Conservation Measure	Category	Gear Type	Category Guidance	Means of Verification	Frequency
			<ul style="list-style-type: none"> - describe the type of system to be installed, and - Indicate when the system will be installed and the expected length of the agreement. <p>2. Once such evidence has been determined to be satisfactory, the vessel will be deemed to be in compliance with this measure for a period of six (6) months, which will allow appropriate time for installation of and training on the electronic monitoring system.</p> <p>3. The vessel owner must provide satisfactory proof that the equipment has been installed and is operating within that time period; in the event that such proof is not provided within grace period, the vessel will return to a non-compliant status with ISSF Conservation Measure 4.3(a).</p>		
4.4(a)	Transshipments	All Purse Seine	No transactions in tuna where transportation included transshipment, except when exempt per Conservation Measure 4.4 (b)(i) or Conservation Measure 8.1.	Auditor reviews data submission for relevant RFMO, transshipment documents, public data/reports, and RFMO compliance committee and commission reports to verify that tuna purchased has not undergone unauthorized transshipment.	Quarterly
4.4(b)(i)	Transshipment Exemption – Papua New Guinea	Large Purse Seine	No transactions in vessels that transship unless they have been granted an exemption under this clause (fishing only in the archipelagic waters of PNG; and that are based in PNG and are associated with processing facilities in PNG).	During the traceability exercise, the auditor reviews any instance of transshipment to assess whether the exemption applies.	Annually
4.4(c)	Transshipment at Sea – Observer Coverage	Large-scale Longline	Processors, traders, importers, marketers and others involved in the seafood industry shall conduct transactions with longline vessels that conduct transshipments at sea, whether high seas, EEZ,	Auditor assesses participating company system to determine observer coverage on large-scale	Annually

Conservation Measure	Category	Gear Type	Category Guidance	Means of Verification	Frequency
			<p>territorial seas or archipelagic waters, only if 100% of such transshipments are observed (either by a human observer on board the longline vessel or onboard the carrier vessel).</p> <p>For the purposes of this measure, a large-scale` longline vessel is defined as a vessel that is equal to or greater than 20m length overall (LOA).</p> <p>This measure comes into effect January 1st, 2018.</p>	<p>longline, and/or transshipment, vessels they source from.</p> <p>Company shall maintain record(s) of RFMO transshipment declarations, which must be signed by the observer present during transshipment.</p>	
5.1	Illegal, Unreported and Unregulated (IUU) Fishing	All	No transactions with vessels on any tuna RFMO IUU vessel list.	Auditor reviews quarterly data sent by the company to the RFMO for the presence of IUU listed vessels.	Quarterly
				Auditor reviews the company purchasing system to prevent IUU fish. This will also be assessed during traceability exercises to verify that products do not originate from IUU vessels and by reviewing compliance committee reports, commission reports, etc.	Annually
5.2	Illegal, Unreported and Unregulated (IUU) Product Response	All	No IUU purchases. If IUU found, company must withdraw these products from the marketplace.	Auditor reviews company recall procedure for presence of IUU policy, then reviews company purchases and compares to RFMO IUU lists.	Annually
				Company initiates market withdrawal of IUU products.	As needed
6.1	Transaction Ban for Large-Scale Purse-Seine Vessels not Actively	Large Purse Seine	Demonstrate that all purchases from large-scale purse seine vessels are from vessels actively fishing for tuna on or before December 31, 2012 but cannot have ceased fishing operations prior to January 1, 2010 and listed on the ISSF Record of Large-Scale Purse Seine	Auditor reviews company purchases from large-scale purse seine vessels to assess whether the source vessels are listed on the ISSF Record of Large-Scale Purse Seine	Annually

Conservation Measure	Category	Gear Type	Category Guidance	Means of Verification	Frequency
	Fishing for Tuna as of December 31, 2012		Vessels (Record). If a vessel is not listed on the Record, the company shall provide evidence of the vessel attributes in accordance with Conservation Measure 6.2 (a). Any updates to the Record must be made in accordance with 6.2(a).	Vessels. If source vessels do not appear in the Record, the company must provide evidence in accordance with Conservation Measure 6.2(a) as described below.	
6.2(a).2.a	Requirements for Inclusion in Record of Large-Scale Purse Seine Vessels Fishing for Tropical Tunas	Large Purse Seine	Provide certification from government body that vessel was licensed to fish for tuna on or before December 31, 2012, and that vessel did not cease fishing operations prior to January 1, 2010.	ISSF reviews evidence provided by vessel owner to determine whether vessel is eligible to be listed on the ISSF Record.	Annually or as needed
6.2(a).2.b	Requirements for Inclusion in Record of Large-Scale Purse Seine Vessels Fishing for Tropical Tunas	Large Purse Seine	To demonstrate that the vessel was contracted for construction before 12/31/12, the vessel representative may provide such evidence as a signed contract, supporting correspondence, deposit paid, plans, photos, etc., certificate from IACS member, IMO number or RFMO record. To demonstrate that construction was completed before 6/30/15, the vessel may provide such evidence as completion of sea trial, certificate from shipyard, sale of fish, skippers log, observer report, etc., certificate from government agency.	Auditor reviews evidence provided by company to determine whether vessel is eligible to be listed on the ISSF Record.	Annually or as needed
6.2(a).2.c			Vessel provides update regarding name, flag or registration number.	ISSF reviews evidence provided by vessel owner to determine whether vessel is eligible to be listed on the ISSF Record.	
6.2(a).2.d			The addition of a new large-scale purse seine vessel that is built as a replacement for a vessel already on the Record that has sunk, has been scrapped or otherwise permanently transferred out of the tropical tuna fishery. The addition of the new vessel will be permitted only to the extent it replaces one or more older vessels on the ISSF Record and its fish hold	Auditor determines whether the old vessel has been scrapped, has sunk and/or has been permanently retired from all tuna fisheries. If scrapping of an old vessel is presented as evidence, auditor looks for scrapping contract and evidence that scrapping has	

Conservation Measure	Category	Gear Type	Category Guidance	Means of Verification	Frequency
			<p>volume is less than or equal to the fish hold volume of the older vessel(s) that were on the ISSF Record.</p> <p>The request for the addition of new vessels shall come either from the owner of the older vessel, or from a new owner designated by the owner of the older vessel.</p> <p>Vessels that do not provide verified proof of the existence of a fish hold are not eligible for use as replacement capacity under this subsection.</p> <p>In circumstances where the vessel owner does not provide proof of a fish hold volume (m3), an independent auditor will make a conservative calculation in accordance with then-current ISSF technical papers.</p> <p>Note: Per CM 7.2, ISSF recognizes that there can be a gap in time after a contract for scrapping the vessel is in place until the time that the vessel is scrapped. A vessel owner may produce an executed scrapping contract and demonstrate that the vessel is permanently retired from fishing activities to begin the auditor's review under this CM. The vessel will then be listed on the Record and PVR 'conditionally' until auditor receives evidence that the old vessel has, in effect, been scrapped, and the new vessel meets the requirements of the CM.</p>	<p>occurred. Such evidence must be received within 6 months of the scrapping contract date.</p> <p>Auditor then reviews whether the new vessel meets the CM requirements.</p>	
6.2(a).3			<p>Vessels on the Record that are refurbished in such a way that their fish hold volume increases will be removed from the Record unless the aggregated replaced capacity is at least 1.0 times the capacity of the vessel before refurbishment.</p>	<p>Auditor reviews evidence provided by company to determine whether vessel is eligible to be listed in the ISSF Record.</p>	

Conservation Measure	Category	Gear Type	Category Guidance	Means of Verification	Frequency
6.2(c)	Investment in Purse Seine Vessels Subject to the PNA Special Arrangement	Large Purse Seine	Processors, traders, importers, transporters, marketers and others involved in the seafood industry that are investors in any new vessels that meet all of the conditions in ISSF Conservation Measure 6.2(b) , and are therefore exempted from compliance with ISSF Conservation Measures 6.1 and 6.2(a) , shall buy out and scrap existing capacity up to the percent of capacity of the new vessel that corresponds to their ownership interest in the new vessel, in accordance with paragraph 2(d) of ISSF Conservation Measure 6.2(a).	<p>Auditor reviews public records as well as evidence provided by vessel owner to determine whether vessel is eligible to be listed on the Record. Auditor will review evidence that majority owner has bought out and scrapped existing capacity up to the percent of capacity of the new vessel that corresponds to their ownership interest in the new vessel, in accordance with paragraph 2(d) of ISSF Conservation Measure 6.2(a).</p> <p>This can include:</p> <ol style="list-style-type: none"> 1) Sales receipt for the capacity that has been bought out and scrapped, which clearly states Fish Hold Volume figures for said capacity; and 2) Evidence that the Fish Hold Volume of the new vessel corresponding to the % ownership stake is less than or equal to that of older vessel(s) that was on the ISSF Record. 	Annually
6.2(d)	Investment in purse seine vessels not in compliance with ISSF Conservation	Large Purse Seine	Processors, traders, importers, transporters, marketers and others involved in the seafood industry, that are investors in any new vessel that does not meet all of the conditions in ISSF Conservation Measures 6.1 and 6.2(a) shall buy out and scrap existing capacity of large-scale tuna purse seine vessel(s) that corresponds to the full capacity of the	Auditor reviews public records as well as evidence provided by vessel owner to determine whether vessel is eligible to be listed on the Record. Auditor will review evidence the ISSF PC (and its affiliates) or the owner with a	Annually

Conservation Measure	Category	Gear Type	Category Guidance	Means of Verification	Frequency
	Measure 6.1 and 6.2(a)		new vessel, in accordance with Paragraph 2(d) of ISSF Conservation Measure 6.2(a).	controlling interest, has bought out and scrapped existing capacity in accordance with paragraph 2(d) of ISSF Conservation Measure 6.2(a). This can include: 1) Sales receipt for the capacity that has been bought out and scrapped, which clearly states Fish Hold Volume figures for said capacity; and 2) Evidence that the Fish Hold Volume of the new vessel(s) is less than or equal to that of the vessel(s) being scrapped (for one-to-one replacements).	
6.2(e)	Purchases from Purse Seine Vessels in Fleets with Other Vessels not in Compliance with ISSF Conservation Measures 6.1 and 6.2(a)	Large Purse Seine	Processors, traders, importers, transporters, marketers and others involved in the seafood industry shall refrain from transactions in skipjack, bigeye and yellowfin tuna caught by any and all large-scale purse seine vessels owned by business organizations or individuals that also own large-scale purse seine vessels not in compliance with ISSF Conservation Measures 6.1 and 6.2(a). For the purposes of this measure, “owned” means a registered or controlling (majority) interest in the vessels: (1) directly or indirectly (through intermediary entities) by any business organization or its affiliated business organizations, including commonly controlled organizations, or	Vessel representative will be asked to provide a complete list of all owned large-scale purse seine vessels, including IMO numbers. Auditor reviews list of owned vessels and compares it to the PVR record. Auditor may review RFMO records, and other publicly available sources of information, to cross-reference ownership declarations.	Annually

Conservation Measure	Category	Gear Type	Category Guidance	Means of Verification	Frequency
			<p>(2) directly or indirectly by any individuals, including individual ownership of any equity or investment interest in whatever form of any business organization operating, managing, controlling or receiving revenues from a vessel. Individuals shall include any natural person and his or her family members (including spouse, domestic partner, child, sibling, parent or grandparent, whether natural, adopted or by marriage).</p> <p>For the purposes of this measure, large-scale purse seine vessels are those with at least 335 m³ fish hold volume.</p> <p>This measure comes into effect January 1st, 2018.</p>		
7.1	Registration of Controlled Vessels	Purse Seine and Supply and Tender Vessels	<p>Processors, traders, importers, transporters, marketers and others involved in the seafood industry, for skipjack, yellowfin and bigeye tuna caught by purse seine vessels shall register all controlled vessels fishing, or operating as supply and tender vessels, for skipjack, yellowfin and bigeye tuna on the ISSF Proactive Vessel Register (PVR) and thereafter maintain such registration indefinitely. Controlled vessels include:</p> <p>(a) vessels majority owned or controlled directly or indirectly (through intermediary entities) by any ISSF Participating Company or any member of the corporate group of which such Participating Company is a part; or</p>	<p>Auditor reviews list of controlled vessels provided by the companies and/or obtained through the PVR database. Auditor uses the PVR, Record of Large-Scale Purse Seine vessels, RFMO authorized vessel lists, national vessel databases and public data/reports to cross-reference list of controlled vessels. If vessels are chartered, auditor will review charter contract(s). Auditor also reviews specialized press for announcements regarding 'new' vessels controlled by, and associated with, companies participating in ISSF.</p>	Annually

Conservation Measure	Category	Gear Type	Category Guidance	Means of Verification	Frequency
			<p>(b) vessels majority owned or controlled directly or indirectly by any individuals⁴ who are majority shareholders (or any equivalent form of ownership) of any ISSF Participating Company); or</p> <p>(c) vessels under the following charter types that are contracted directly or indirectly (through intermediary entities) by any ISSF Participating Company or any member of the corporate group of which such Participating Company is a part or directly or indirectly by any individuals who are majority shareholders (or any equivalent form of ownership) of any ISSF Participating Company:</p> <ul style="list-style-type: none"> (i) bareboat charters, no matter the duration of the charter; and (ii) time and/or association charters if the duration of the charter is 12 months or longer. 		
7.2	Threshold Requirement for PVR Listing	Large Purse Seine	<p>Obtain written verification that all supplier large-scale purse seine vessels owned by the same business organization meet the requirements of Section 6 – Capacity.</p> <p>For the purposes of this measure, “owned” means a registered or controlling (majority) interest in the vessel(s).</p>	<p>Auditor reviews the efficacy of the verification process used by PCs.</p> <p>Auditor reviews publicly available information on the ownership of vessels.</p>	Annually
7.3	Purchases from PVR Vessels	Large Purse Seine	<p>For fishing trips beginning on or after January 1, 2016, source 100% of skipjack, yellowfin and bigeye tuna caught by large-scale purse seine vessels from vessels registered in the PVR.</p>	<p>Auditor isolates skipjack, yellowfin and bigeye tuna caught by large-scale purse seiners within the quarterly RFMO data submission and compares trip dates and</p>	Quarterly

⁴ For the purposes of this measure, individuals shall include any natural person and his or her family members (including spouse, domestic partner, child, sibling, parent or grandparent, whether natural, adopted or by marriage).

Conservation Measure	Category	Gear Type	Category Guidance	Means of Verification	Frequency
				purchase data to PVR listing dates. Supporting documentation may be requested to verify the accuracy of trip dates.	
7.4	Supply and Tender Vessels	All Purse Seine	<p>1. Processors, traders, importers, transporters, marketers and others involved in the seafood industry, for skipjack, yellowfin and bigeye tuna with controlled supply or tender vessels that operate with purse seine vessels fishing for skipjack, yellowfin and bigeye tuna, shall:</p> <p>(a) register all such vessels on the ISSF ProActive Vessel Register (PVR) and thereafter maintain such registration indefinitely;</p> <p>(b) ensure all such vessels are listed on the authorized vessel record of any of the RFMO governing the ocean area in which the tuna was caught;</p> <p>(c) ensure all such vessels have an IMO unique vessel identifier; and</p> <p>(d) ensure all such vessels are not listed on the IUU Vessel List of any RFMO.</p> <p>2. For the purposes of this measure, controlled vessels include vessels as defined in ISSF CM 7.1.</p> <p>3. When registering all controlled supply or tender vessels on the PVR, in addition to the vessel attribute data already required as part of the PVR listing application, the vessel owner must provide the vessel names and flags of all the purse seine vessels that the listed supply or tender vessels support, to the maximum extent possible.</p>	<p>Auditor asks participating company for list of supply and tender vessels and checks whether vessels are listed on the PVR.</p> <p>Auditor verifies vessel attribute data, IMO number, RFMO registration, ownership, and whether vessel(s) appear on RFMO IUU lists.</p> <p>Auditor reviews list of PS vessels linked to each supply & tender vessel. PS vessel list must include vessel names and flags.</p>	Annually

Conservation Measure	Category	Gear Type	Category Guidance	Means of Verification	Frequency
			<p>4. For purposes of this measure, supply and tender vessels are any vessel used, or intended for use, for the purpose of fishing or the transport of fishery products.</p> <p>This measure comes into effect January 1st, 2018.</p>		
8.1	Exemption for Very Small Purse Seine Vessels ⁵	Small Purse Seine	<p>Very small purse seine vessels are exempted from the following ISSF Conservation Measures:</p> <p>3.4 Skipper Best Practices</p> <p>4.4(a) Transshipment</p>	The company can demonstrate that the vessel is less than 30 GT by providing fishing licenses, vessel surveys, photos, etc.	Annually

⁵ For the purposes of this measure “very small purse seine vessels” are those vessels of a size less than 30 GT.

3.1 Audit Determination and Reporting

The auditing described in this document serves as an assessment of conformance by PCs. Any significant gaps in conformance and where corrective actions may be necessary will be specified. Timelines for remediation will be in accordance with the [ISSA Compliance Policy](#) and confirmed by MRAG. Depending on the nature of the non-conformance and the required corrective action, a follow up audit may be required (see ISSA Compliance Policy).

3.1.1 Non-conformances

Conformance is categorized into grades (Conformance, Observation, Minor Non-Conformance or Major Non-Conformance). Non-conformances must be raised against specific ISSF conservation measures. The severity of the non-conformance – and whether this jeopardizes the integrity of the ISSF program – determines which non-conformances are raised.

MRAG Americas defines audit findings as follows:

- Conformance - the PC can provide evidence of compliance with a conservation measure or commitment
- Observation - the PC is currently in compliance but there is a high risk that non-conformance could occur inadvertently without implementing preventative actions
- Minor Non-conformance – the PC does not comply with a conservation measure or commitment, but this does not compromise the integrity of the ISSF initiatives⁶
- Major Non-conformance – the PC does not comply with a conservation measure or commitment and this compromises the integrity of the ISSF initiatives⁷

MRAG Americas' procedures for handling non-conformances for PCs are as follows:

- MRAG Americas substantiates conformance through documented evidence.
- Where a company cannot provide documented evidence of conformance with a conservation measure or commitment, a non-conformance must be issued.
- All non-conformances must be graded either major or minor.
- In the case of a non-conformance, ISSF may require a Corrective Action Response (CAR) in accordance with the ISSA Compliance Policy.

3.1.2 Corrective Action Responses (CARs)

To rectify certain non-conformances, the PC may be given the opportunity to provide a CAR in accordance with the ISSA Compliance Policy. The nature of the CAR is at the discretion of the PC. MRAG Americas does not advise on what specific corrective action the PC may take but will assess whether the CAR is expected to address the non-conformance.

3.1.3 Audit Reports

All audit reports are provided directly to ISSF and the PC designated contact person via email notification. Actions following receipt of the final report, including the opportunity for a CAR and/or sanctions are in

⁶ Example: PC submitted RFMO data beyond the stated deadline.

⁷ Example: PC did not submit RFMO data.

accordance with the ISSA Compliance Policy. Any issues raised by the PC with regard to the audit findings will be directed to ISSF.

Final Audit Reports and any updated compliance status reports will be retained electronically for the duration of the PC's participation and will be available to ISSF at all times.

4 Annex 1. Audit Program Policy

4.1 Overall Audit Policy

It is the policy of MRAG Americas to ensure that its audit operations are consistent with defined standards and procedures to maintain the highest appropriate level of quality. To this end, MRAG Americas undertakes ISSF audits per the standards and procedures described in this manual and only within the scope of the ISSF conservation measures current at the time of auditing. MRAG Americas has developed this document and its auditing procedures with guidance from ISO/IEC 17065:2012(E).

Specifically, it is the policy of MRAG Americas to ensure that:

- All ISSF audits meet these documented standards for independence, accuracy, precision, representativeness, comparability, and suitability to their intended purposes;
- All ISSF audits are verifiable and defensible, and all components related to their generation are properly documented;
- Data integrity is maintained and documented;
- Data confidentiality is maintained;
- Audit Program reviews are conducted on a scheduled and documented basis;
- Managers, supervisors, and staff throughout MRAG Americas, and its contractors, understand their roles in managing quality; receive the training necessary to meet quality standards for job tasks; and are encouraged to identify and suggest improvements to the program.

4.2 Program Manager

In all respects, the Program Manager (Mr. Oleg Martens) is responsible for ensuring that the content of this manual is followed. The Program Manager is the main contact point at MRAG Americas for ISSF audit-related queries and drives the MRAG Americas program.

The Program Manager's main responsibilities include:

- a) Organizing and coordinating ISSF audits for MRAG Americas
- b) Supervising assessment teams
- c) The first point of contact for ISSF audit enquiries
- d) Ensuring quality assurance of documentation
- e) Maintenance of data confidentiality
- f) Regularly convening MRAG Americas senior management for review and oversight
- g) Identifying potential conflicts of interest
- h) Leading program review and improvements

The Program Manager ensures the audit policy and systems are amended and updated as necessary and is responsible for ensuring changes and improvements are captured and communicated to auditors for implementation in subsequent assessments, as appropriate.

4.3 Assessment Team

MRAG Americas selects auditors and other experts based on their competence, training, qualifications, and experience for an Assessment Team (or individual) to conduct ISSF audits. All personnel involved in the audit are provided with and briefed on up-to-date ISSF documentation for auditors. Documentation includes:

- a) Contractual obligations on auditors, including requirements to report actual and potential conflicts of interest and to maintain confidentiality;
- b) Specification of division of responsibilities between auditors and experts of MRAG Americas;
- c) Procedures to be undertaken by auditors;
 - prior to audits;
 - during onsite audits;
 - after audits, e.g., specification of responsibilities and recommended schedules for report writing; and
- d) Information about the overall role of the auditor and audit process in maintaining the integrity of the conservation measures.

Any person engaged by MRAG Americas as an auditor for the ISSF audit program has:

- received a copy of this document;
- received sufficient training in the correct procedures and requirements for ISSF audits;
- received a copy of all applicable ISSF conservation measures;
- received a copy of ISSF Audit Checklists (Annex 2);
- received a copy of ISO 19011 Standard;
- sufficiently demonstrated their performance and capabilities to the appropriate level prior to conducting solo audits; and
- signed an MRAG Americas contract (either as an employee or contractor), which includes terms of reference, conflict of interest, confidentiality, a Statement of Non-Disclosure, timing, and responsibilities of the assessor.

4.4 Auditor training

Audits are carried out by fully trained MRAG Americas auditors. These auditors are experienced in other audit programs and will be provided with ISSF audit training to ensure they fully understand the specific ISSF audit criteria.

The training program will include:

- Desktop training (remote)
- Shadow audit(s) observing an MRAG Americas experienced auditor
- Annual refresher training
- Performance review audits by an MRAG Americas experienced auditor

4.5 Documentation and Means of Verification

Document control procedures are used to ensure accurate tracking and management of all documentation utilized during audits. Other than documents requiring an original signature, such as contracts with clients, which may be kept in both paper and electronic formats, MRAG Americas keeps electronic versions of documents for official record keeping.

Copies of vessel and company documentation (either electronic or hard copy) are considered acceptable audit evidence. In some instances, for example in the case of commercially sensitive documents, sighting of a document on a computer screen during a webinar session (i.e. using screen sharing) may be an option⁸.

Where a company is audited for purposes other than ISSF, evidence from those audits can be submitted as evidence for the purposes of the ISSF audit. However, while those other audits can be used to provide additional evidence and enhance efficiency for the company to report information showing conformance with conservation measures, they cannot be used to supplant the MRAG Americas audit against ISSF conservation measures.

MRAG Americas will use the PC Compliance checklist for all audits. The completed and reviewed audit checklist will also serve as the audit report. A copy of the audit report will be provided to both ISSF and the company.

MRAG Americas will endeavor to allocate auditors who speak the language in common use at the company being audited. Translation of audit evidence into English and/or audit reports from English into the language of the company will be the responsibility of ISSF.

4.6 Confidentiality and data security

4.6.1 Confidentiality

Much of the information needed to confirm conformance with ISSF conservation measures may be confidential to the PC being audited. MRAG Americas limits access to confidential data to employees and contract auditors authorized to work on specific audits. MRAG Americas understands that the fishing, management, and/or processing operations they assess may include proprietary fishing strategies, locations, data, and business information and practices. All MRAG Americas employees involved in PC audits, including office personnel and individuals participating in subcontracts (e.g. contract auditors) sign a binding confidentiality/non-disclosure agreement in which they undertake not to discuss or communicate any confidential information to third parties other than as required within MRAG Americas as a normal part of the audit programme. Data are not to be released, reproduced, distributed, or published without prior approval of ISSF. MRAG Americas follows strict data management procedures to protect the confidentiality of audit information. MRAG does not publish any form of audit data, other than as required in the ISSF audit process, without the express consent of ISSF.

MRAG Americas reserves the right to disclose Confidential Information to its responsible employees and individuals participating in subcontracts with a *bona fide* need to know such Confidential Information. Recipients are informed that the information is confidential and is for the sole purpose of the specific project. MRAG Americas may disclose Confidential Information if and to the extent that such disclosure is required by applicable law, provided that they use reasonable efforts to limit the disclosure by means of a protective order or a request for confidential treatment and provide the owners of the information

⁸ The decision regarding whether sighting of a document in this way is acceptable will be made by the Auditor following policy advice from MRAG Americas. This will depend on the nature of the document and the conservation measure or commitment for which it is being used as evidence of conformance.

(i.e. the PC) a reasonable opportunity to review the disclosure before it is made, and to interpose its own objection to the disclosure.

4.6.2 Data Security

ISSF data and/or open computer files will not be left unattended and confidential data are gathered from output devices immediately. Any data output not included in reports sent to ISSF are shredded immediately. MRAG uses a multi-user network of computers. MRAG will ensure security of the network with a three-level approach. The original networking software will contain firewall code that will protect the network from unauthorized access. Access to all network terminals is by password only.

All computer files associated with, or containing, confidential data are stored only in directories on a system that is password-protected, and only authorized personnel have access to system passwords. Each authorized employee will have a unique password and passwords will allow access to only select files. The Program Manager is responsible for maintaining data security.

4.7 Compliance with legal requirements

MRAG Americas complies with all legal requirements in the countries in which the company operates and key personnel have demonstrable understanding of such legislation and regulations.

Should MRAG Americas become aware at any time that legal proceedings have been instigated or other allegations concerning the legal compliance of MRAG Americas activities associated with this program arise, we shall notify ISSF as soon as is practicable and within a maximum of seven days. MRAG Americas shall advise ISSF of the outcome of any such proceedings or allegations.

4.8 Program Review

Program review for PC audits will occur annually. The Program Manager will also conduct ongoing program reviews (on a minimum annual basis) to ensure program activities are as effective and efficient as practicable to achieve program outcomes.
