Overview
Per the ISSF Strategic Plan, Advancing Sustainable Tuna Fisheries, ISSF will: Ensure participating company compliance with all ISSF conservation measures — with an emphasis on traceability from product to processing facility to fishery to vessel — and communicate results publicly to promote transparency, and to support and enhance ISSF’s credibility and influence among interested stakeholders.

Audit Process
ISSF engaged MRAG Americas to conduct an audit of the performance of the participating companies against the conservation measures and commitments in-force during the above audit period. MRAG developed the following categories of conformance that provide interested stakeholders with an explanation of conformance by individual measure:

CATEGORIES OF COMPLIANCE

<table>
<thead>
<tr>
<th>Conformance</th>
<th>Company can provide evidence of full compliance.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minor Non-Conformance</td>
<td>Company does not fully comply with a particular conservation measure or commitment, but this does not compromise the integrity of ISSF initiatives. Example: Participating Company submitted RFMO data beyond the stated deadline.</td>
</tr>
<tr>
<td>Major Non-Conformance</td>
<td>Company does not comply with a particular conservation measure or commitment, and this compromises the integrity of ISSF initiatives. Example: Participating Company did not submit RFMO data.</td>
</tr>
</tbody>
</table>

AUDIT RESULTS as Reported March 2021, Updated Results
All companies; across all measures

![Bar chart showing compliance percentages]

1 Covid-19 Pandemic Impact on Audit Process: In response to the COVID-19 pandemic, MRAG Americas issued a Notice to the ISSF Participating Companies and Vessels listed on the ProActive Vessel Register: Audit Protocol Override due to COVID-19 in March 2020. MRAG determined that no modifications to the audit process due to COVID-19 disruptions were necessary.

2 The auditors may also make a finding of “Observation” with regard to a particular conservation measure when a Participating Company is in conformance with that measure, but there is a high risk that a non-conformance could occur inadvertently without implementing preventive action. In addition, in some circumstances where a particular conservation measure is not applicable to a Participating Company, the audit report will contain an “N/A” finding. Both of these findings are considered to be a Conformance as described above for reporting purposes.

The results included in this document are based on the independent, third-party audit of data provided directly to the auditor by ISSF participating companies, conducted in accordance with the established Audit Protocols and the ISSA Compliance Policy, and show the status of compliance as of September 30, 2020. MRAG issued final individual participating company compliance reports in March 2021. Audit reports on individual companies’ remediation of non-conformances after an annual report’s audit period and publication date are available on the ISSF site (see reports with “Update of Compliance Status” titles).
Aggregate Company Compliance Performance

Tracking Aggregate Compliance
This report details the level of compliance with each conservation measure and presents aggregate compliance by individual company. A summary view of each company’s compliance is presented in this report.

Each individual company’s full compliance audit results for 2020 as reported by MRAG, which feed this aggregate report, were published on the ISSF website in March 2021.

This report will be updated in the fourth quarter of 2021 to reflect any improvements in compliance by ISSF participating companies. Any improvements in a company’s compliance made before the publication of the update of this report will be noted in the individual company’s compliance reports, available on the ISSF website.

Compliance Overview
MRAG’s audit for the reporting period showed:

• 24 companies were in CONFORMANCE with all 30 measures in effect during the reporting period.
• 1 company had one MINOR NON-CONFORMANCE.
• 1 company had four MAJOR NON-CONFORMANCE.

LEVEL OF COMPLIANCE by Individual ISSA Companies — as Reported March 2021

1.1 RFMO Authorized Vessel Record
All purchases must be from vessels listed on the authorized vessel record of the RFMO governing the ocean area in which the tuna was caught, at the time of the fishing trip, so long as the vessel is of a size subject to listing in the RFMO authorized vessel record.

Fully compliant: 26

1.2 RFMO Participation
All purchases must be from vessels flagged to a member or cooperating non-member of RFMO relevant to fishing area.

Fully compliant: 26

2.1 Product Traceability
Participating company must demonstrate ability to trace products from can code or sales invoice to vessel and trip.

Fully compliant: 26

2.2 Quarterly Data Submission to RFMO
Send information as described in the measure to RFMO scientific bodies for each quarter by the last day of the following calendar quarter.

Fully compliant: 26

2.3 Product Labeling by Species and Ocean of Capture
On all product labeling, or through a publicly available web-based system by product, for all branded tuna products:
1. Identify the species of tuna contained in the product.
2. Identify the ocean of capture for the tuna contained in the product.

Fully compliant: 25
Minor non-conformance: 1

<tr>
<td>7.2</td>
<td>Threshold Requirement for PVR Listing</td>
<td>All large-scale purse seine vessels owned by the same business organization shall be in demonstrated compliance with, or otherwise exempted from, Section 6 – Capacity.</td>
</tr>
<tr>
<td>7.3</td>
<td>Purchases from PVR Vessels</td>
<td>For fishing trips beginning on or after January 1, 2016, source 100% of skipjack, yellowfin and bigeye tuna caught by large-scale purse seine vessels from vessels registered in the PVR.</td>
</tr>
</tbody>
</table>
### 7.4 Supply and Tender Vessels

For controlled supply or tender vessels that operate with purse seine vessels: (a) register all vessels on the PVR and maintain registration indefinitely; (b) ensure all are listed on the authorized vessel record of any RFMO governing the ocean area in which the tuna was caught; (c) ensure all have an IMO unique vessel identifier; and (d) ensure all are not listed on the IUU Vessel List of any RFMO.

**Fully compliant: 26**

### 7.5 Purchases from PVR Vessels (Longline)

If purchasing albacore, yellowfin and bigeye tuna from longline vessels: (a) develop and make public a statement of intent to increase purchases from longline vessels registered on the PVR; (b) publish the percentage of their longline purchases from PVR registered longline vessels, or indicate no such purchases made.

**Fully compliant: 26**

### 8.1 Exemption for Very Small PS Vessels

Very small purse seine vessels (less than 30 GT) are exempted from the following ISSF Conservation Measures: 3.4 Skipper Best Practices, 4.2 Purse Seine Unique Vessel Identifiers, 4.4(a) Transshipment.

**Fully compliant: 26**
