Audit purpose	
Audit objective	The purpose of this audit is to validate participating company compliance with all ISSF conservation measures in place for the year of activity being audited.
Audit criteria	The PC compliance audits cover all conservation measures as defined in the ISSF Participating Company Compliance: Audit Policy Document and Standard Operating Procedures, Version 2015/1.
Audit outcomes	The auditing serves as an assessment of conformance by PCs. Any significant gaps in conformance and where corrective actions may be necessary will be specified. Timelines for remediation will be prescribed by MRAG in the audit report, however any sanctions or other actions will be at the discretion of ISSF. Depending on the nature of the non-conformance and the required corrective action, a follow up audit may be required.
Purpose of this document	All auditors will follow this checklist for conducting ISSF PC Compliance audits. The completed and approved copy of this checklist will serve as the audit report for each participating company.
Other relevant documentation	ISSF Participating Company Compliance: Audit Policy Document and Standard Operating Procedures, Version 2015/1

Conformance with ISSF Commitments	
Non-conformances	Non-conformances must be raised against specific ISSF conservation measures. The severity of the non-conformance – and in particular whether this jeopardizes the integrity of the ISSF program – determines which non-conformances are raised.
Grading	MRAG Americas defines audit findings as follows:

	<ul style="list-style-type: none"> · Conformance - the PC can provide evidence of compliance with a particular conservation measure. · Observations - the PC is currently in compliance but there is a high risk that non-conformance could occur inadvertently without implementing preventative actions. · Minor Non-conformance – the PC does not comply with a particular conservation measure, but this does not compromise the integrity of the ISSF initiatives. · Major Non-conformance – the PC does not comply with a particular conservation measure and this compromises the integrity of the ISSF initiatives.
MRAG Americas' procedures	<p>MRAG Americas' procedures for handling non-conformances for PCs are as follows:</p> <ul style="list-style-type: none"> · MRAG Americas substantiates conformance through documented evidence. · Where a company cannot provide documented evidence of conformance with a conservation measure, a non-conformance must be issued. · All non-conformances must be graded either major or minor. · In the case of a non-conformance, ISSF may require a Corrective Action Response (CAR). The corrective actions must be in place and evidence of addressing the condition must be supplied to MRAG or ISSF within an agreed timescale or a follow up audit may be required.
Corrective Action Responses (CARs)	<p>To rectify non-conformances, the PC may be given the opportunity to provide a CAR. The nature of the CAR is at the discretion of the PC. MRAG Americas does not advise on what specific corrective action the PC may take, but will assess whether the CAR is expected to address the non-conformance. MRAG Americas will also not provide advice with respect to any sanction that might be applied to a PC resulting from identified non-conformances. Such action will be at the discretion of the ISSF.</p>
